

Enhanced Rx Savings Program

Pharmacy discounts for covered students

We are pleased to provide a new enhanced benefit to your current prescription drug benefit program. The enhanced benefit will help you save on medications not covered by your prescription benefit, as well as over-the-counter medications (with a valid prescription) and diabetes supplies.

You're already enrolled in the enhanced benefit and can use it at participating pharmacies that accept your existing prescription drug card. Just present your card along with a valid prescription to the pharmacist. If the medication is not covered by your prescription drug benefit, you may be able to purchase your non-covered medication at a reduced price.

Program features and benefits:

- The **program is free** to covered students, and requires **no additional card**.
- Nearly covered by the same national network of **over 67,000 pharmacies**, including major chains and local stores.
- The program provides discounts on medications and diabetic supplies not covered by the plan, and on over-the-counter medications with a valid prescription.
- Discounts **do not apply** to out of pocket expense or deductibles.

The program is provided to plan participants as an enhancement to the current prescription drug benefit. It is not considered to be insurance on any medications not covered or reimbursable by your prescription drug benefit program.

If you have questions about the enhanced benefit, please contact the Customer Service department at 1-800-756-3702.
